Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 September 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 9 and 39-41 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/9/08. The applicant elected species C: three elongated tubular bodies.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8,9,11-33,35,37,38 and 42-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Storz (U.S. Patent No. 4,449,532).

Storz teaches three elongate bodies (5,4,3 Fig. 1) with passageways (from proximal to distal end) and mating members (11 col. 2, ll. 62-69 elements 2, 3 and 4 all have grooves, and these tubes engage each other), the second (4) being external of the first (3). The outward projecting members are a bounded thread track (Fig. 2) which prevents rotation. When the distal ends of the first, second and third dilators are disengaged the dilators are free to rotate (col. 3, ll. 48-50). The second dilator (4) is shorter than the first dilator (3). The first dilator being configured to receive the guidewire (2). Storz teaches a method of dilating bodily tissue, including inserting a

first dilator and advancing the second over the first and engaging the first to prevent rotation (col. 3, ll. 25-35).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Storz (U.S. Patent No. 4,449,532) as applied to claims 1 and 31 above and further in view of Smith (U.S. Patent No. 4,862,891).

Storz teaches the claimed invention but does not specify the geometry of the dilators, however Smith teaches tapered frustraconical configuration (Fig. 1). It would have been obvious to one of ordinary skill in the art to have a frustraconical configuration as this allows for smoother access into the tissue.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MELISSA RYCKMAN whose telephone number is (571)272-9969. The examiner can normally be reached on Monday thru Friday 7:30-4:00.
